

**As Puppies  
these are the dry foods and nibbles we love to eat**

As puppies these are the tin foods we sometimes enjoy

Pet's own puppy milk every now and then after eating dry food.

chocolate not good

Good ✓

As puppies these are the things we love to eat  
fresh ricotta cheese  
in small portions Raw or cooked beef mince

Cooked chicken no bones

carrots for cooking  
or to chew on as a  
chewy treat

As adults we like to eat these dry foods just as they are or Mixed together in a cookie jar ( container)

As adults we like to eat these meats occasionally

beef mince

cooked chicken

We also enjoy these cheeses in small amounts sometimes

Ricotta

or mild cheese

Get your own bone

Knuckle bones

or

brisket bone good when teething or keep teeth clean

This is recommended for us puppies  
Vetsense wormgard puppy suspension

Two sided metal comb

non scratching wire brush

natural bristle brush

Untangle comb for long hair

**SHAMPOOS / CONDITIONER

CONDITIONER AVAILABLE**

**THIS SHAMPOO  
RECOMMENDED  
FOR ADULTS AND  
PUPPIES WITH A  
GOOD CONDITIONER**

**THIS SHAMPOO CAN BE  
USED FOR ADULTS WITH  
A GOOD CONDITIONER**

Hello new puppy OWNER!

If you've recently welcomed a new puppy into your home, then this is the Test for you The Puppy Test is designed to help you access and understand your new best friend's behavior and provide you with useful Pet Tips. **Did you know... The canine nose works one million times more efficiently than the human nose!**

**And the average dog has 42 permanent teeth. Check regular for clean teeth, and feed a good quality dog-food. And provide always clean fresh water.**

**PET TIP There is no right or wrong answer here. Sleeping with your pet is not for everyone but it can be a good way to bond with your new best friend. Do keep in mind that where your puppy sleeps in the first few weeks, is where he or she will expect to sleep forever. If you do let your puppy sleep on your bed then make sure you use regular intestinal worm and flea control using vet-approved products. Making sure your pet is well groomed is important but you should limit bathing to every 2 weeks at most.(A Medicated Wash "TRIOCIL" is the answer- recommend by the Breeder Helmut ) Finally, your pet should not be aggressive or possessive when it comes to sleeping on furniture and should always move aside when asked.**

**2. Have you provided your puppy with any toys? a. Yes b. No**

**PET TIP- Well done if you've already bought some toys for your pup, if this isn't you, then there are some excellent toys available that are educational and entertaining. Toys that must be manipulated by your pet to release treats are an example. They are great for puppies and it can be entertaining watching your puppy learn how to get to the treat. Ask your veterinarian for some recommendations. The most important point to remember is that no pet toy is indestructible and no pet toy is 100 per cent safe. You should always use a pet toy under supervision until you are confident that your pet can use it safely. Puppies love sampling things with their mouths so keep potential hazards such as string and electrical cords out of reach.**

**PET TIP Pets are notorious for doing funny things and are a**

**great source of amusement whether it is your cat playing in a paper bag or your dog running crazily around the backyard. It's important to take the time to appreciate your pet and any idiosyncrasies, as a bit of laughter never hurt anyone!**

**3. Have you given your puppy any milk? a. Yes b. Only pet approved milk c.  go to Feeding to find the answer.**
